## Discharge Medication Billing Rule

Dear Valued Healthcare Provider,

As per of our constant effort to improve our process with our healthcare providers, we would like to inform you of the revisions to our billing method for Discharge Medication effective November 1, 2017.

From this date on, all Discharge Medication should be billed through the PBM system only and if this is not feasible then the discharge medication for the first 7 date (post discharge) will be billed thorough the inpatient claim and medication from the 8th day onwards will be billed through the PBM system as an outpatient claim.

Failure to follow this may lead to automated rejections which will not be possible to reverse later.

This new revision will lead to a unified billing process for medication, ensuring a more efficient settlement of your claims.
